

Manuscript no. HAEMATOL/2011/060657 entitled “Age-dependent D-dimer cut-off value increases the number of older patients in whom deep vein thrombosis can be safely excluded“

Authors: Renée A. Douma, Melanie Tan, Roger E.G. Schutgens, Shannon M. Bates, Arnaud Perrier, Cristina Legnani, Douwe H. Biesma, Jeffrey S. Ginsberg, Henri Bounameaux, Gualtiero Palareti, Marc Carrier, Gerben C. Mol, Grégoire Le Gal, Pieter W. Kamphuisen, Marc Righini

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
• Renée A. Douma, Department of Vascular Medicine, Academic Medical Center, Amsterdam, the Netherlands, r.a.douma@amc.uva.nl

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Renée Douma, Grégoire Le Gal, Pieter Kamphuisen, Marc Righini

3) Design & Methods. The following authors were responsible for specific investigations:
• Melanie Tan, Roger Schutgens, Cristina Legnani, Shannon Bates, Arnaud Perrier, Douwe Biesma, Jeffrey Ginsberg, Henri Bounameaux, Gualtiero Palareti, Marc Carrier, Gerben Mol were responsible for acquisition of data
• Renée Douma, Grégoire Le Gal, Pieter Kamphuisen, Marc Righini were responsible for the design of the study
• Renée Douma performed the general analyses and the analyses for cohort 1 and 2
• Melanie Tan performed the analysis for cohort 5
• Cristina Legnani performed the analysis for cohort 3
• Shannon Bates performed the analysis for cohort 4

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:
• Renée Douma is responsible for the results section, cohort 1 to 4.
• Melanie Tan is responsible for the result section, cohort 2.
• Renée Douma is responsible for the figure and the tables.
• Data collection cohort 1: Roger E.G. Schutgens
• Data collection cohort 2: Marc Righini
• Data collection + analysis cohort 3: Cristina Legnani
• Data collection + analysis cohort 4: Shannon M. Bates
• Data collection + analysis cohort 5: Melanie Tan

5) **Writing the manuscript.** The following authors were responsible for writing the manuscript:

- Renée Douma and Melanie Tan are responsible for writing the manuscript
- All other authors are responsible for critical revision of the manuscript
- All authors are responsible for final approval of the manuscript version to be published

6) **Contributors Listed in Acknowledgments:** none.
