

Manuscript no. HAEMATOL/2012/066159 entitled “Genetic variations in T-cell activation and effector pathways modulate alloimmune reactivities after allogeneic hematopoietic stem cell transplantation for patients with hematological malignancies”

Authors: Haowen Xiao, Yi Luo, Xiaoyu Lai, Shan Fu, Jimin Shi, Yamin Tan, Jingsong He, Wanzhuo Xie, Weiyang Zheng, Li-Mengmeng Wang, Lifei Zhang, Lizhen Liu, Xiujin Ye, Xiaohong Yu, Zhen Cai, Maofang Lin, and He Huang.

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- He Huang, Bone Marrow Transplantation Center, The First Affiliated Hospital, Zhejiang University School of Medicine, No. 79 Qingchun Rd., Hangzhou, 310003, Zhejiang province, P R China.

E-mail: hehuang.zju@gmail.com

- Haowen Xiao ¹Bone Marrow Transplantation Center, The First Affiliated Hospital, Zhejiang University School of Medicine, Hangzhou, Zhejiang province, P R China.

- ²Department of Haematology, Guangzhou Liuhuaqiao Hospital, Guangzhou, Guangdong province, P R China.

E-mail: haowenxiao1974@hotmail.com

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Haowen Xiao, He Huang

3) Design & Methods. The following authors were responsible for specific investigations (please detail):

- Haowen Xiao, Yi Luo and Xiaoyu Lai were responsible for analysis and interpretation of the data.

- Yi Luo, Jimin Shi, Yamin Tan, Jingsong He, Wanzhuo Xie, Weiyang Zheng, , Xiujin Ye, Xiaohong Yu, Zhen Cai, Maofang Lin and He Huang were responsible for acquisition of data and final approval of the version to be published.

- Haowen Xiao, Shan Fu, Li-Mengmeng Wang, Lifei Zhang and Lizhen Liu were responsible for performing experiments.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Haowen Xiao, Yi Luo, Xiaoyu Lai and He Huang were responsible for Table1.

- Haowen Xiao and He Huang were responsible for Table2, Figure1-4.

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Haowen Xiao and He Huang were responsible for writing the manuscript.

6) Contributors Listed in Acknowledgments:

This work was funded in part by Key Project of the National Natural Science Foundation of China (81230014), National High Technology Research and Development Program of China (2012AA020905), and the National Natural Science Foundation of China (81100387, 81170501, 81170526, 81070443). We would like to thank Shanghai Genesky Bio-Tech Genetic Core Lab for their excellent technical assistance with sequencing analysis. We also thank the HLA Typing Laboratory of the Blood Center of Zhejiang Province for their assistance.
