A randomized phase II study to evaluate tacrolimus in combination with sirolimus or methotrexate after allogeneic hematopoietic cell transplantation. *Haematologica* 2012;97(12):1882-1889. doi:10.3324/haematol.2012.067140

Online Supplementary Figure S2. Absolute numbers of Treg at designated time points according to study arm. (MTX = methotrexate/tacrolimus-treated patients, SIR = sirolimus/tacrolimus-treated patients; Treg absolute number units = number of cells/ μ L). $P = NS$ for each comparison.

Online Supplementary Figure S3. Absolute numbers of non-Treg CD4⁺ lymphocytes at designated time points according to study arm. (MTX = methotrexate/tacrolimus-treated patients, SIR = sirolimus/tacrolimus-treated patients; non-Treg CD4⁺ absolute number units = number of cells/ μ L). $P = NS$ for each comparison.
