

Manuscript no. HAEMATOL/2012/065664, entitled “ALK-positive anaplastic large cell lymphoma limited to the skin: clinical, histopathological and molecular analysis of 6 pediatric cases-a report from the ALCL99 study“

Authors: Ilske Oschlies, Jasmin Lisfeld, Laurence Lamant, Atsuko Nakazawa, Emanuele SG d'Amore, Ulrika Hansson, Konnie Hebebeda, Ingrid Simonitsch-Klupp, Jadwiga Maldyk, Leonhard Müllauer, Marianne Tinguely, Markus Stücker, Marie-Cecile LeDeley, Reiner Siebert, Alfred Reiter, Laurence Brugieres, Wolfram Klapper, Wilhelm Wössmann

Information about the contributions of each person named as having participated in the study

- 1) **Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
- Ilske Oschlies and Wolfram Klapper, department of pathology, hematopathology section and lymphnode registry, Christian-Albrechts-university and university hospitals Schleswig Holstein, Kiel, Germany, ioschlies@path.uni-kiel.
 - Wilhelm Wössmann, NHL-BFM study center, department of hematology and oncology, Justus-Liebig University, Giessen, Germany

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) **Authors who participated in the conception of the study:** Ilske Oschlies, Alfred Reiter, Wilhelm Wössmann, Wolfram Klapper, Laurence Brugieres

3) **Design & Methods.** The following authors were responsible for specific investigations

- Ilske Oschlies, Wolfram Klapper, Wilhelm Wössmann, Alfred Reiter and Laurence Brugieres contributed to the conception and design of the study.

Reiner Siebert performed and interpreted the FISH-analyses.

Marie-Cecile LeDeley, Jasmin Lisfeld, Alfred Reiter, Laurence Brugieres and Markus Stücker were responsible for acquisition of clinical data.

- Ilske Oschlies, Laurence Lamant, Atsuko Nakazawa, Emanuele SG d'Amore, Ulrika Hansson, Konnie Hebebeda, Ingrid Simonitsch-Klupp, Jadwiga Maldyk, Leonhard Müllauer, Marianne Tinguely, Wolfram Klapper performed the histopathological review including interpretation of the immunohistochemical stainings

4) **Results.** The following authors were responsible for specific portions of the results, including figures and tables

- Ilske Oschlies, Laurence Lamant, Atsuko Nakazawa, Emanuele SG d'Amore, Ulrika Hansson, Konnie Hebebeda, Ingrid Simonitsch-Klupp, Jadwiga Maldyk, Leonhard Müllauer, Marianne Tinguely, Wolfram Klapper were responsible for the results of the histopathological review including interpretation of the immunohistochemical stainings.
- Ilske Oschlies was responsible for figures 1 and 2 as well as for the table 1

Wilhelm Wössmann and Jasmin Lisfeld, Marie-Cecile LeDeley and Laurence Brugieres were responsible for table 2

- Wolfram Klapper and Ilske Oschlies were responsible for table 3
- Markus Stücker was responsible for figure 1 A (clinical picture)
- Reiner Siebert was responsible for figure 1 F (FISH picture)
- Marie-Cecile LeDeley, Jasmin Lisfeld, Alfred Reiter, Laurence Brugieres and Markus Stücker were responsible for the described clinical data.

5) **Writing the manuscript.** The following authors were responsible for writing the manuscript:

- Ilske Oschlies, Wolfram Klapper and Wilhelm Wössmann were responsible for writing the manuscript
- All authors revised the draft version of the manuscript critically for important intellectual content

6) **Contributors Listed in Acknowledgments:**

This work was supported by the José-Carreras-Foundation (DJCLS R08/09). RS and WK are supported by the Kinderkrebs Initiative Buchholz, Holm-Seppensen, Germany. The ALCL99 study was supported by the Forschungshilfe Peiper and the Association Cent pour Sang la Vie, France. None of the authors reported any other potential conflicts of interest.

The authors are indebted to all the children and parents who participated in this study; to Nathalie Bouvet, Institut Gustave-Roussy, Villejuif, France, for database management and Oliviera Batic, Dimitry Abramov and Reina Zühlke-Jenisch for their technical assistance
