

Manuscript no. HAEMATOL/2012/069807 entitled “The murine growth differentiation factor 15 is not essential for systemic iron homeostasis in phlebotomized mice”

Authors: Guillem Casanovas, Maja Vujić Spasić, Carla Casu, Stefano Rivella, Jens Strelau, Klaus Unsicker, and Martina U. Muckenthaler

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Guillem Casanovas, Boston Children’s Hospital / Harvard Medical School, guillem.casanovas@childrens.harvard.edu
- Martina U. Muckenthaler, Department of Pediatric Oncology, Hematology and Immunology, University Hospital of Heidelberg, martina.muckenthaler@med.uni-heidelberg.de

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Guillem Casanovas, Martina U. Muckenthaler

3) Design & Methods. The following authors were responsible for specific investigations (please detail):

- Guillem Casanovas, Maja Vujić Spasić and Martina U. Muckenthaler were responsible for the analysis of phlebotomized Gdf15^{-/-} mice
- Jens Strelau and Klaus Unsicker were responsible for the generation and handling of Gdf15^{-/-} mice
- Carla Casu and Stefano Rivella were responsible for the analysis of th3^{+/+} mice

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Guillem Casanovas was responsible for tables 1 and S1, and figure 1
- Maja Vujić Spasić was responsible for figure S1
- Carla Casu and Stefano Rivella were responsible for the analysis of th3^{+/+} mice

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Guillem Casanovas and Martina U. Muckenthaler were responsible for writing the manuscript

6) Contributors Listed in Acknowledgments:

The authors would like to thank Klaus Schmitt for his technical assistance with phlebotomies, and Raeka S. Aiyar and Julien Gagneur for their useful advice during the analysis of the data.

Martina U. Muckenthaler acknowledges funding from the E-RARE/BMBF project 01GM1005. Jens Strelau and Klaus Unsicker thank the German Research Foundation (DFG) for support of their research on GDF15. Stefano Rivella and Carla Casu are supported by the National Institutes of Health (NIDDK-1R01DK090554 to S.R.)
