

Manuscript no. HAEMATOL/2012/075895 entitled “Q141K polymorphism of ABCG2 protein is associated with poor prognosis in adult acute myeloid leukemia treated with idarubicin-based chemotherapy”

Authors: Mario Tiribelli, Dora Fabbro, Alessandra Franzoni, Renato Fanin, Giuseppe Damante, and Daniela Damiani

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

Mario Tiribelli and Daniela Damiani, Division of Hematology and Bone Marrow Transplantation, Azienda Ospedaliero-Universitaria Udine, Udine, Italy mario.tiribelli@uniud.it; daniela.damiani@uniud.it

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.
