

Manuscript no. HAEMATOL/2012/074039 entitled “Prophylaxis in congenital factor VII deficiency: indications, efficacy and safety. Results from the Seven Treatment Evaluation Registry (STER)”

Authors: Mariasanta Napolitano, Muriel Giansily-Blaizot, Alberto Dolce, Jean-François Schved, Guenter Auerswald, Jørgen Ingerslev, Jens Bjerre, Carmen Altisent, Pimlak Charoenkwan, Lisa Michaels, Ampaiwan Chuansumrit, Giovanni Di Minno, Ümran Caliskan, and Guglielmo Mariani

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Mariasanta Napolitano, Hematology Unit, Regional Reference Center for Thrombosis and Haemostasis, University of Palermo, Palermo, Italy, marysanta@libero.it
- Guglielmo Mariani, Università di Ferrara Medical School, Ferrara, Italy, gmprivate39@gmail.com

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Guglielmo Mariani, Mariasanta Napolitano, Muriel Giansily-Blaizot, Alberto Dolce

3) Design & Methods. The following authors were responsible for specific investigations (please detail):

- Alberto Dolce was responsible for statistical analysis
- Mariasanta Napolitano, Jean F. Schved, Guenter Auerswald, Carmen Altisent, Pimlak Charoenkwan, Lisa Michaels, Ampaiwan Chuansumrit, Giovanni Di Minno, Ümran Caliskan, were responsible for patients’ recruitment
- Jørgen Ingerslev was responsible for inhibitor assay
- Jens Bjerre was responsible for designing the study protocol

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Alberto Dolce was responsible for all figures and tables in the text
- Jean F. Schved, Guenter Auerswald, Jørgen Ingerslev, Carmen Altisent, Pimlak Charoenkwan, Lisa Michaels, Ampaiwan Chuansumrit, Giovanni Di Minno, Ümran Caliskan were responsible for clinical analysis of results

5) Writing the manuscript. The following authors were responsible for writing the various drafts of the manuscript:

- Mariasanta Napolitano
- Muriel Giansily-Blaizot
- Guglielmo Mariani

6) Contributors Listed in Acknowledgments:

- Prof. F. Bernardi and Prof. M. Pinotti performed the gene mutation analysis (some of the mutations were characterized in their lab at the University of Ferrara, Italy)
- Mehran Karimi, Arlette Ruiz de Saez, Uriel Martinowitz and Gili Kenet, Nuria Bermejo, Dragan Micic contributed to data collection
- Quintiles provided the following services: Global project management (Late Phase Global Project Management - Dr J.L. Merot, Quintiles-Benefit SNC, 3-5 rue Maurice Ravel, 92594 Levallois-Perret, Cedex, France), Site start-up, Remote site monitoring and data cleaning by Project Coordination centre
- Anne Stirland (medical writer, PAREXEL) provided editorial assistance to the authors during the preparation of this manuscript, financially supported by Novo Nordisk A/S, in compliance with international guidelines for good publication practice
