

**Manuscript no. HAEMATOL/2012/072009 entitled “Predicting deep venous thrombosis in pregnancy: external validation of the “left” clinical prediction rule“**

**Authors: Marc Righini, Christelle Jobic, Françoise Boehlen, Jean Broussaud, François Becker, Morgan Jaffrelot, Marc Blondon, Bruno Guias, and Grégoire Le Gal**

**Information about the contributions of each person named as having participated in the study**

**1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:**

- Marc Righini, Geneva University Hospital, marc.righini@hcuge.ch
- Grégoire Le Gal, Brest University Hospital, gregoire.legal@chu-brest.fr

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

**The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

**2) Authors who participated in the conception of the study:**

- Marc Righini, Grégoire Le Gal, Françoise Boehlen, François Becker, Bruno Guias, Christelle Jobic, Jean Broussaud

**3) Design & Methods. The following authors were responsible for specific investigations (please detail):**

- Marc Righini: study design, data analysis
- Grégoire Le Gal: study design, data analysis, statistical analysis
- All authors: clinical evaluation of patients, inclusion in the study, ultrasound examination, follow-up of patients, management of the database

**4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):**

- Marc Righini and Grégoire Le Gal responsible for all Tables and Figures

**5) Writing the manuscript. The following authors were responsible for writing the manuscript:**

- Marc Righini and Grégoire Le Gal: writing the manuscript
- All authors: manuscript review and final approval of the manuscript

**6) Contributors Listed in Acknowledgments: (Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Corresponding authors must declare whether they had assistance with the study design, data collection, data analysis, or manuscript preparation. If such assistance was available, the authors must disclose the identity of the individuals who provided this assistance and the entity that supported it. Financial and material support should also be acknowledged.)**

The study was supported by grants from the Projet Hospitalier de Recherche Clinique (Grant no. 2005 R 08.01) in France, and from the Swiss National Foundation (Grant no. 3200B0-120760) in Switzerland. The sponsors had no role in study design and the collection, analysis, and interpretation of data and the writing of the article and the decision to submit it for publication
