

**Manuscript no. HAEMATOL/2012/076240 entitled “Differential effects of the type of iron chelator on the absolute number of hematopoietic peripheral progenitors in patients with  $\beta$ -thalassemia major”**

**Authors: Gian Luca Forni, Marina Podestà, Marco Musso, Giovanna Piaggio, Khaled M. Musallam, Manuela Balocco, Sarah Pozzi, Alessandra Rosa, Francesco Frassoni**

**Information about the contributions of each person named as having participated in the study**

**1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:**

- Gian Luca Forni, Ematologia-Centro della Microcitemia e delle Anemie Congenite, Ospedale Galliera, Genoa, Italy, gianluca.forni@galliera.it
- Francesco Frassoni, Laboratorio Cellule Staminali Post-Natali e Terapia Cellulari, Ospedale Gaslini, Genoa, Italy, francesco.l.frassoni@gmail.com

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

**The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

**2) Authors who participated in the conception of the study:**

- Gian Luca Forni, Francesco Frassoni

**3) Design & Methods. The following authors were responsible for specific investigations:**

- Manuela Balocco, Marco Musso were responsible for patient data collection
- Marina Podestà, Marco Musso, Giovanna Piaggio, Sarah Pozzi were responsible for laboratory experiments
- Khaled M. Musallam, Alessandra Rosa, Marco Musso were responsible for statistical analysis

**4) Results. The following authors were responsible for specific portions of the results, including figures and tables:**

- Marina Podestà, Giovanna Piaggio, Sarah Pozzi were responsible for Clonogenic Assays and Flow Cytometry
- Marco Musso was responsible for Cell Preparation
- Manuela Balocco, Gian Luca Forni, Francesco Frassoni were responsible for patients follow up during chelation therapy
- Khaled M. Musallam, Alessandra Rosa were responsible for elaboration of results and all figures and tables production

**5) Writing the manuscript. The following authors were responsible for writing the manuscript:**

- Gian Luca Forni was responsible for introduction and discussion
- Khaled M. Musallam was responsible for results
- Manuela Balocco was responsible for design and methods
- All authors were responsible for critical revision of the manuscript for important intellectual content

**6) Contributors Listed in Acknowledgments:**

- The study was partially supported by a grant from Fondazione Carige, Genoa, Italy
