

Manuscript no. HAEMATOL/2012/078709 entitled “Darbepoietin-a has comparable erythropoietic stimulatory effects to recombinant erythropoietin whilst preserving the bone marrow microenvironment“

Authors: Sita R. Dewamitta, Megan R. Russell, Harshal Nandurkar and Carl R. Walkley

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Carl WALKLEY; St. Vincent’s Institute of Medical Research, Fitzroy, Victoria 3065 Australia

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Walkley, Dewamitta and Nandurkar

3) Design & Methods. The following authors were responsible for specific investigations:

- Dewamitta was responsible for the design of dosing experiments
- Russell was responsible for the microCT methods
- Nandurkar was responsible for the design of dosing experiments
- Walkley was responsible for the design of all experiments

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:

- Figure 1 - experiments were performed by Dewamitta and Walkley with technical assistance from Russell; data and results were calculated by Dewamitta and Walkley
- Figure 2 - experiments were performed by Dewamitta and Walkley with technical assistance from Russell; data and results were calculated by Dewamitta
- Figure 3 - experiments were performed by Dewamitta and Russell; data and results were generated by Russell

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Dewamitta wrote the manuscript
- Walkley wrote the manuscript

6) Contributors Listed in Acknowledgments:

- Assoc/Prof L Purton - comments on manuscript, general comments on approach
- Dr M. Wall - comments on manuscript, general comments on approach
- Dr N Walsh - comments on microCT analysis, help with data viewing for density rendered images
- Dr V Sankaran - comments on manuscript, general comments on approach
- Prof T.J Martin - comments on manuscript, general comments on approach
- SVH BioResources Centre - animal husbandry

- T Jovic - technical assistance with microCT
- E. DeLuca - technical assistance with sample preparation
- Financial Support:

This work was supported by grants from the Leukaemia Foundation, National Health and Medical Research Council of Australia (NHMRC; to C.W.); NHMRC Career Development Award (C.W.); in part by the Victorian State Government Operational Infrastructure Support Program (to St. Vincent's Institute). C.W. is the Philip Desbrow Senior Research Fellow of the Leukaemia Foundation
