

Manuscript no. HAEMATOL/2012/065219 entitled “Mosaic segmental uniparental isodisomy and progressive clonal selection: a common mechanism of late onset β -thalassemia major”

Authors: Cornelis L Hartevelde, Chiara Refaldi, Antonino Giambona, Claudia A L Ruivenkamp, Mariëtta J V Hoffer, Jeroen Pijpe, Peter De Knijff, Caterina Borgna-Pignatti, Aurelio Maggio, Maria D Cappellini and Piero C Giordano

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole: • Cornelis L Hartevelde , Department of Human and Clinical Genetics, Leiden University Medical Center, 2300 RC Leiden, The Netherlands., c.l.hartevelde@lumc.nl

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Antonino Giambona and Aurelio Maggio (U.O.C. Ematologia II con Talassemia, Azienda Ospedaliera Vincenzo Cervello, via Trabucco 180, 90146 Palermo, Italy), Caterina Borgna-Pignatti (Department of Clinical and Experimental Medicine-Pediatrics, University of Ferrara, Ferrara, Italy), Maria D Cappellini (Centro Anemie Congenite, Fondazione IRCCS Cà Granda, Ospedale Maggiore Policlinico, Università degli studi di Milano, Milano, Italia), Peter De Knijff and Piero C Giordano (Department of Human and Clinical Genetics, Leiden University Medical Center, 2300 RC Leiden, The Netherlands).

3) Design & Methods. The following authors were responsible for specific investigations:

- Chiara Refaldi was responsible for part of the practical work such as DNA sequencing, MLPA analysis and data-analysis
- Claudia A L Ruivenkamp and Mariëtta J V Hoffer were responsible for Affymetrix experiments and data-analysis.
- Jeroen Pijpe was responsible for the Illumina experiments and data-analysis

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:

- Chiara Refaldi and Cornelis Hartevelde were responsible for Table 1
- Chiara Refaldi and Cornelis Hartevelde were responsible for figure 1
- Jeroen Pijpe was responsible for figure 2

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Cornelis Hartevelde was responsible for writing the introduction, materials and methods, results and discussion sections
- Jeroen Pijpe was responsible for writing part of the materials and methods and part of the results concerning the Illumina data-analysis
- Maria Cappellini, Piero Giordano and Chiara Refaldi were responsible for writing the patient history

6) Contributors Listed in Acknowledgments:

The contributor listed in the acknowledgements is prof. André Uiterlinden, he gave permission to use the Illumina array facilities in the EMC in Rotterdam (NL) for scanning the Illumina BeadChip arrays. He was not involved in study design, data collection, data analysis, manuscript preparation or technical assistance. The Leiden Genome Technology Center (LGTC) provided assistance in the Affymetrix array analysis, by giving permission to use equipment. There was no financial support.
