

Manuscript no. HAEMATOL/2012/074187 entitled “Elevated levels of STAT1 in Fanconi anemia group A lymphoblasts correlate with their sensitivity to DNA interstrand crosslinking drugs”

Authors: Inés Prieto-Remón, Dámaso Sánchez-Carrera, Mónica López-Duarte, Carlos Richard and Carlos Pipaón

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Carlos Pipaón, PhD, Instituto de Formación e Investigación Marqués de Valdecilla (IFIMAV), cpipaon@humv.es

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Carlos Pipaón

3) Design & Methods. The following authors were responsible for specific investigations:

- Inés Prieto Remón and Dámaso Sánchez Carrera were responsible for making the experiments
- Mónica López Duarte and Carlos Richard were responsible for treating the patients, collecting the samples, reviewing the manuscript and suggesting clinical important directions

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:

- Inés Prieto Remón and Dámaso Sánchez Carrera were responsible for the technical development of all the experiments showed (Figures 1 to 5)
- Mónica López Duarte and Carlos Richard were responsible for the collection of primary samples used in the protein and RNA expression studies (Figure 1)
- Carlos Pipaón was responsible for designing the experiments of the study (Figures 1-5)

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Carlos Pipaón was responsible for writing the manuscript

6) Contributors Listed in Acknowledgments:

- Doctors Badell, Sevilla and Estella provided bone marrow and peripheral blood samples from their patients
- Rosario Gaitán managed the delivery of the samples
- Doctors Bueren and Surrallés gave us the lymphoblastoid cell lines used in the work
- The work was financially supported by Instituto de Salud Carlos III, Fundación Marqués de Valdecilla and Universidad de Cantabria
- Fundación Marqués de Valdecilla also funded the contracts of Inés Prieto Remón and Dámaso Sánchez Carrera
