

Manuscript no. HAEMATOL/2012/076901 entitled “JAK2 p.V617F allele burden in myeloproliferative neoplasms one month after allogeneic stem cell transplantation significantly predicts outcome and risk of relapse“

Authors: Thoralf Lange, Anja Edelmann, Udo Siebolts, Rainer Krahl, Claudia Nehring, Nadja Jäkel, Michael Cross, Jacqueline Maier, Dietger Niederwieser, and Claudia Wickenhauser

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Wickenhauser Claudia, MD, claudia.wickenhauser@uniklinik-leipzig.de
- Lange, Thoralf, MD, thoralf.lange@medizin.uni-leipzig.de
- Edelmann, Anja, anja.edelmann@medizin.uni-leipzig.de

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study:

- Wickenhauser Claudia, MD, claudia.wickenhauser@uniklinik-leipzig.de
- Lange, Thoralf, MD, thoralf.lange@medizin.uni-leipzig.de
- Edelmann, Anja, anja.edelmann@medizin.uni-leipzig.de
- Niederwieser, Dietger, dietger.niederwieser@medizin.uni-leipzig.de

3) Design & Methods. The following authors were responsible for specific investigations:

- Siebolts Udo, Jaqueline Maier and Michael Cross were responsible for the design and establishment of the methods
- Claudia Nehring and Nadja Jäkel were responsible for the selection of the patients, for providing of the clinical data including the follow up analysis and the study design
- Rainer Krahl was responsible for the statistical analysis

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:

Claudia Nehring and Nadja Jäkel were responsible for provision of the patient’s characteristics and outcome (Table 1, Table 2a and 3b)

- Siebolts Udo, Jaqueline Maier and Michael Cross were responsible for generation of the PCR based data (JAK2 allele burden) including establishment of a new assay of particular sensitivity (Table 3, Table 2a and 2b)
- Rainer Krahl was responsible for the statistical evaluation of the collected data (Table 2a and 2b, Figure 1 and 2)

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Wickenhauser Claudia was responsible for interpretation of the data and for writing the manuscript

- Lange, Thoralf, Anja Edelmann, Dietger Niederwieser, Michael Cross and Udo Siebolts were also responsible for the manuscript. In detail, they assisted in interpreting the data and writing the manuscript

6) Contributors Listed in Acknowledgments:

- There was no financial or material support for the realization of this project
