

**Manuscript no. HAEMATOL/2012/074534 entitled “Lenalidomide, melphalan, and prednisone followed by lenalidomide maintenance improves health-related quality of life in newly diagnosed multiple myeloma patients aged 65 years or older: results of a randomized phase III trial“**

**Authors: Meletios A. Dimopoulos, Michel Delforge, Roman Hajek, Martin Kropff, Maria T. Petrucci, Philip Lewis, Annabel Nixon, Jingshan Zhang, Jay Mei, and Antonio Palumbo**

**Information about the contributions of each person named as having participated in the study**

**1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:**

Meletios A. Dimopoulos, University of Athens School of Medicine, Alexandra Hospital, E-mail: mdimop@med.uoa.gr

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

**2) Authors who participated in the conception of the study:**

All the authors participated in the conception of the study

**3) Design & Methods. The following authors were responsible for specific investigations:**

- Meletios A. Dimopoulos, Michel Delforge, Roman Hajek, Martin Kropff, Maria T. Petrucci, and Antonio Palumbo all recruited patients into the study
- Jingshan Zhang participated in the statistical analysis
- Jay Mei provided clinical input
- Philip Lewis and Annabel Nixon coordinated the research

**4) Results. The following authors were responsible for specific portions of the results, including figures and tables:**

All authors contributed to the data presented in this manuscript and share responsibility and accountability for the result.

**5) Writing the manuscript. The following authors were responsible for writing the manuscript:**

All authors have participated in the writing of the manuscript and reviewed it for important intellectual content. The authors were fully responsible for the content of this manuscript and editorial decisions concerning it

**6) Contributors Listed in Acknowledgments:**

This work was funded by Celgene International SARL. Oxford Outcomes provided assistance in the preparation of this manuscript, statistical and data analysis was facilitated by Mrs. Stefanie Millar (ICON Plc), and medical writing assistance was provided by Dr Helen Doll (Senior Research Associate, Norwich Medical School, University of East Anglia, UK). The authors received editorial support from Adriana Stan, Ph.D. (Excerpta Medica). The authors were fully responsible for the content of this manuscript and editorial decisions concerning it
