<b>Title</b>	<i>Natural History and Prognostic Impact of Oligoclonal Humoral Response in Patients with Multiple Myeloma after Autologous Stem-Cell Transplantation: Long-term Results from a Single Institution</i>
<b>First author</b>	<i>Natalia Tovar, Carlos Fernandez de Larrea</i>

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

*Specific contributions of each author are listed on page 2 of this document.*

### **Responsible author(s):**

*author(s) responsible for the integrity of the work as a whole*

**Author contributions (maximum 1 page):**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)*

Natalia Tovar, Carlos Fernandez de Larrea and Joan Blade designed the study, collected and analyzed data, performed statistical analysis, wrote and reviewed the paper; Juan I. Arostegui, Montserrat Elena, Xavier Filella and Jordi Yague performed the assays, reviewed and approved the paper; Maria Teresa Cibeira, Laura Rosinol and Montserrat Rovira treated the patients, collected data and reviewed the paper. All authors approved the final version of the manuscript.
