haematologica *the hematology journal*

author contribution form

Title	*No association between the XPD Lys751Gln (rs13181) polymorphism and disease phenotype or leukemic transformation in primary myelofibrosis*
First author	*Valentina Poletto*

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):
"Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript
(collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

Valentina Poletto, Laura Villani, Paolo Catarsi performed the molecular analysis of the samples for the XPD polymorphism; Giovanni Barosi, Vittorio Rosti Margherita Massa and Alessandro Vannucchi did separate analysis of the data. Giovanni Barosi wrote the first draft of the manuscript; All the authors participated in correcting and editing the final version of the manuscript
