author contribution form

Title	Manuscript no HAEMATOL/2013/088369 Congenital erythrocytosis associated with gain-of-function <i>HIF2A</i> gene mutations and erythropoietin levels in the normal range
First author	Perrotta Silverio

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Name: **Silverio Perrotta**
Institute: **Dipartimento della Donna, del Bambino e di Chirurgia Generale e
Specialistica, Second University of Naples, Naples, Italy**
e-mail: **silverio.perrotta@unina2.it**

Name: **Fulvio Della Ragione**
Institute: **Department of Biochemistry, Biophysics and General Pathology, Second
University of Naples, Naples, Italy**
e-mail: **fulvio.dellaragione@unina2.it**

Author contributions (maximum 1 page):

1. Authors who participated in the conception of the study:

Silverio Perrotta (Dipartimento della Donna, del Bambino e di Chirurgia Generale e Specialistica, Second University of Naples, Naples, Italy), Fulvio Della Ragione (Department of Biochemistry, Biophysics and General Pathology, Second University of Naples, Naples, Italy) and Roland H. Wenger (Institute of Physiology and Zürich Center for Human Physiology (ZIHP), University of Zürich, Zürich, Switzerland)

2. Design and Methods. The following authors were responsible for specific investigations:

- a) Bruno Nobili, Maddalena Casale, Silvia Fasoli and Adriana Balduzzi recruited the patients;
- b) Francesca Punzo and Saverio Scianguetta performed the genetic work;
- c) Daniel P. Stiehl and Katarzyna J. Nytko carried out in vitro hydroxylation and all the transfection experiments
- d) Adriana Borriello, Debora Bencivenga and Lilla Cro performed the studies on primary erythroid cultures

3. Results. The following authors were responsible for specific portions of the results, including figures and tables:

- a) Silverio Perrotta and Fulvio Della Ragione were responsible for elaboration of results and all figures:
- b) Francesca Punzo and Saverio Scianguetta were responsible for figures 1, 2, 3 and 6A
- c) Roland H. Wenger, Daniel P. Stiehl and Katarzyna J. Nytko were responsible for figures 4 and 5
- d) Adriana Borriello, Debora Bencivenga and Lilla Cro were responsible for figures 6B and 6C.

4. Writing the manuscript. The following authors were responsible for writing the manuscript:

- a) Silverio Perrotta and Fulvio Della Ragione were responsible for writing the introduction, materials and methods, results and discussion sections
- b) Roland H. Wenger and Daniel P. Stiehl were responsible for writing part of the methods, results and discussion

All authors were responsible for critical revision of the manuscript for important intellectual content

5. Contributors Listed in Acknowledgments:

This work was partly supported by grants from “Progetti di Rilevante Interesse Nazionale, PRIN” (to S.P. and F.D.R.), from “Dipartimento della Donna, del Bambino e di Chirurgia Generale e Specialistica” of the Second University of Naples (Normal and Pathological Hematopoiesis) (to S.P.), Regione Campania “Laboratorio pubblico per l’identificazione di inibitori del pathway dell’Oxygen Sensing per la terapia di malattie rare” (to S.P.), from the Associazione Italiana per la Ricerca sul Cancro (AIRC) grant n. 11653 (to F.D.R.), from Science Foundation grant 31003A_129962/1 (to R.H.W. and D.P.S.).
