Title	<i>Specific and global coagulation assays in the diagnosis of discrepant mild haemophilia A</i>
First author	<i>Bowyer A</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

Annette Bowyer collected the samples, carried out the majority of the experiments and wrote the first draft of the manuscript.

Steve Kitchen supervised the coagulation laboratory work, held regular supervisory meetings and revised multiple drafts of the manuscript.

Joost van Veen supervised the global assay work and revised multiple drafts of the manuscript.

Anne Goodeve was responsible to the genetic data in the paper and revised multiple drafts of the manuscript.

Michael Makris wrote the grant application, ethics application, supervised the work and revised the manuscript.
