Title	<i>Array comparative genomic hybridization and sequencing of 23 genes in 80 patients with myelofibrosis at chronic or acute phase</i>
First author	<i>Mandy Brecqueville</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

AM was the principal investigator for the paper and takes primary responsibility for the paper. MB performed the laboratory work for this study, with assistance of RG.

JR, RD, VGB, CA, MJM, NV and AM recruited the patients, and collected the samples and the annotations.

MJM performed the cytogenetic analyses.

MB, RD and AG did the statistical analyses.

MB performed the data analysis.

MB and AG performed the generation of figures.

MB, DB and AM coordinated the research and did interpretation of data.

MB, DB and AM wrote the paper, and JA and MC provided assistance with aCGH and editing.

The authors report no potential conflicts of interest.
