## author contribution form

<b>Title</b>	<i>In vivo</i> activation of the human $\delta$ -globin gene: the therapeutic potential in $\beta$ -thalassemic mice
<b>First author</b>	Maria Francesca Manchinu, Maria Francesca Marongiu.

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

*Specific contributions of each author are listed on page 2 of this document.*

### Responsible author(s):

*author(s) responsible for the integrity of the work as a whole*

**Author contributions (maximum 1 page):**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)*

Maria Francesca Manchinu and Maria Francesca Marongu performed experiments and contributed to analyze data and to write the manuscript.

Daniela Poddie, Carla Casu, Veronica Latini and Michela Simbula performed the experiments and contributed to analyze the data.

Renzo Galanello and Paolo Moi performed hematological analysis and critically reviewed the manuscript.

Antonio Cao contributed to design research and experiments, contributed to analyze the data.

Susanna Porcu: contributed to design the research and experiments, contributed to analyze and interpret data, contributed to writing the manuscript.

Maria Serafina Ristaldi: designed research and experiments, analyzed and interpreted data, wrote the manuscript and finally approved of the version to be published.
