author contribution form

Title	Manuscript no. HAEMATOL/2013/096669 A phase II study of vorinostat (MK-0683) in patients with primary myelofibrosis and post-polycythaemia vera myelofibrosis
First author	Christen Andersen

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

Hanne Vestergaard, Ole Weis Bjerrum and Hans Hasselbalch all collected patient-data throughout the study. Tobias Klausen performed statistical analysis. Nana Brochmann Mortensen collected patient-reported outcome data. Christen Lykkegaard Andersen collected patient-data, analyzed and interpreted data and wrote the manuscript. All authors revised the manuscript critically for important intellectual content before submission and approved of the final version to be published.
