| <b>Title</b>        | Achieving deeper molecular response is associated with a better clinical outcome in chronic myeloid leukaemia patients on imatinib frontline therapy. |
| <b>First author</b> | Gabriel ETIENNE   |

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

*Specific contributions of each author are listed on page 2 of this document.*

### **Responsible author(s):**

*author(s) responsible for the integrity of the work as a whole*

Name: François-Xavier Mahon

Institute: Laboratoire d'Hématologie et Service des maladies du Sang, Centre Hospitalier Universitaire de Bordeaux, France

e-mail: g.etienne@bordeaux.unicancer.fr

**Author contributions (maximum 1 page):**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)*

Gabriel Etienne, Stéphanie Dulucq, Franck-Emmanuel Nicolini and François-Xavier Mahon wrote the report. Stéphanie Dulucq and Stéphane Morisset did the statistical analysis. Gabriel Etienne, François-Xavier Mahon, Franck-Emmanuel Nicolini, Gérald Marit, Josy Reiffers, Caroline Bureau, Didier Adiko, Isabelle Tigaud, Anna Schmitt and Josy Reiffers supervised patient care. Stéphanie Dulucq, Sandrine Hayette, Eric Lippert performed molecular and cytogenetic analyses. Marie-Pierre Fort and Madeleine Etienne collected data. Gabriel Etienne, François-Xavier Mahon, Stéphanie Dulucq, Franck-Emmanuel Nicolini and Josy Reiffers made substantial contributions to study conception and design, analysis, and data interpretation and critically reviewed and approved the final version of the report. All the contributors have proof read the paper and agree with the data presented.
