Title	Next Generation Sequencing based Multi-Gene Mutational Screen for Acute Myeloid Leukemia using MiSeq: Applicability for Diagnostics and Disease Monitoring.
First author	Rajyalakshmi Luthra

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Name: Rajyalakshmi Luthra

Institute: University of Texas MD Anderson Cancer Center

e-mail: rluthra@mdanderson.org

Name: Rajesh R Singh

Institute: University of Texas MD Anderson Cancer Center

e-mail: rsingh@mdanderson.org

Author Contributions:

Luthra R and Singh RR: Designed the study, planned experiments and their execution, data analysis and manuscript writing

Reddy NG: Conducted experiments and data analysis

Haghshenas V, Barkoh BA and Harmon MA: Conducted experiments

Patel KP: Pathology review and review of results

Kanagal-Shamanna R: Review of clinical history and cytogenetics

Routbort MJ: Informatics support for NGS data output and annotation

Medeiros LJ: Review of results and manuscript writing

Kantarjian H, Cortes J, Ravandi F: Review of the results and clinical information
