<b>Title</b>	Thalassemic erythrocytes release microparticles loaded with hemichromes by redox activation of p72Syk kinase
<b>First author</b>	Emanuela Ferru

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

*Specific contributions of each author are listed on page 2 of this document.*

**Responsible author(s):**

*author(s) responsible for the integrity of the work as a whole*

Name: Francesco Turrini  
Institute: University of Turin  
e-mail: Francesco.turrini@unito.it

**Author contributions (maximum 1 page):**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)*

**Franco Turrini, Emanuela Ferru and Antonella Pantaleo** designed the experiments, analyzed the data and contributed to the writing of the manuscript; **Emanuela Ferru, Antonella Pantaleo, Valentina Gallo** performed experiments; **Emanuela Ferru** contributed to the preparation of images; **Franco Carta, Franca Mannu and Amina Khadjavi** performed the analysis by Mass Spectrometry. **Luisa Ronzoni, Giovanna Graziadei and Maria Domenica Cappellini** provided blood samples and clinical analysis. All authors reviewed the manuscript.
