Title	<i>The effect of iron loading and iron chelation on the innate immune response and subclinical organ injury during human endotoxemia, a randomized trial</i>
First author	<i>LT van Eijk</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

Lucas T van Eijk designed and performed the study, analyzed and interpreted data, and drafted the manuscript. Suzanne Heemskerk supervised the oxidative stress and GSTA1-1 and GSTP1-1 measurements, interpreted data and edited the manuscript. Rob W van der Pluijm and Susanne M van Wijk recruited subjects and assisted with the conduct of the study and reviewed the manuscript. Wilbert HM Peters supervised the oxidative stress and GSTA1-1 and GSTP1-1 measurements and edited the manuscript. Matthijs Kox and Johannes G van der Hoeven edited the manuscript. Dorine W Swinkels designed the study, interpreted data and edited the manuscript. Peter Pickkers was the principal investigator, designed the study, interpreted data and reviewed the manuscript.
