<b>Title</b>	Copy number genome alterations are associated with treatment response and outcome in relapsed childhood <i>ETV6/RUNX1</i> -positive acute lymphoblastic leukemia
<b>First author</b>	Bokemeyer, Almut

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

*Specific contributions of each author are listed on page 2 of this document.*

### **Responsible author(s):**

*author(s) responsible for the integrity of the work as a whole*

Name: Seeger, Karl, Prof. Dr. Dr. ....  
Institute: Charité Universitätsmedizin Berlin, Dept. Ped. Oncology/Hematology, Germany  
e-mail: [karl.seeger@charite.de](mailto:karl.seeger@charite.de) .....

### **Author contributions (maximum 1 page):**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)*

*Authors:* Almut Bokemeyer, Cornelia Eckert, Franziska Meyr, Gabriele Koerner, Arend von Stackelberg, Reinhard Ullmann, Seval Türkmen, Günter Henze, Karl Seeger: KS conceived the content and the concept of the study, its realization and takes primarily responsibility for the paper. AB, RU, FM, ST and GK performed the laboratory work for this study. AB analyzed and interpreted data and prepared the manuscript of the paper. CE interpreted data, conducted the statistical analysis, and provided MRD data. AvS and GH provided the clinical data of the international treatment protocol ALL-REZ BFM. All authors have read and approved the manuscript.
