<b>Title</b>	Knockdown of Hnrnpa0, a del(5q) gene, alters myeloid cell fate in murine cells through regulation of AU-rich transcripts.
<b>First author</b>	David J. Young and Angela Stoddart (co-first authors).

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

*Specific contributions of each author are listed on page 2 of this document.*

### **Responsible author(s):**

*author(s) responsible for the integrity of the work as a whole*

Name: Angela Stoddart  
Institute: University of Chicago  
e-mail: astoddar@bsd.uchicago.edu

Name: Michelle LeBeau  
Institute: University of Chicago  
e-mail: mlebeau@bsd.uchicago.edu

**Author contributions (maximum 1 page):**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)*

David J. Young designed research, performed experiments, analyzed results, generated figures and co-wrote the manuscript

Angela Stoddart supervised research, performed experiments, analyzed data, generated figures and co-wrote the manuscript

Joy Nakitandwe performed experiments, analyzed data and generated supplemental figure.

Shann-Ching Chen analyzed data

Zhijian Qian designed and performed experiments

James R. Downing supervised research and analyzed data

Michelle M. Le Beau designed and supervised research, analyzed data and co-wrote the manuscript.
