author contribution form

Title	<i>p53 protein expression independently predicts outcome in patients with lower-risk myelodysplastic syndromes with del(5q)</i>
First author	<i>Leonie Saft</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

LS, TF, JB, KJM, and EHL designed the study and take primary responsibility for this paper.

LS, KJM, and EHL performed collection and assembly of the data.

LS, KJM, and EHL wrote the paper.

LS performed the laboratory work for this study. LS and TF performed the statistical analysis.

GJM, AK, GG, AG, DS, PM, GS, MM, DB, and PF contributed to the provision of study material, patient recruitment, and acquisition of data.

All authors participated in the data analysis and interpretation, revised the manuscript critically, and gave final approval to submit for publication.
