author contribution form

Title	<i>Markedly elevated serum total N-terminal propeptide of type I collagen is a novel marker for the diagnosis and follow-up of patients with POEMS syndrome</i>
First author	<i>Chen Wang and Ying-Lei Zhou</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

Chen Wang and Ying-Lei Zhou collected the data, analyzed the data and wrote the manuscript. Hao Cai, Xin-Qi Cheng, Wen-Ying Kang, Xu-Zhen Qin and Hui-Juan Han performed the experiments. Wei Zhang, Ming-Hui Duan and Xin-Xin Cao participated in patient recruitment. Dao-Bin Zhou supervised the study and analyzed the data. Jian Li initiated the study, recruited patients, analyzed the data and critically revised the manuscript. All authors approved the final manuscript.
