## AUTHOR CONTRIBUTION FORM

<b>Title</b>	<i>Age is a prognostic factor even among patients with multiple myeloma younger than 66 years treated with high-dose melphalan: the IFM experience on 2316 patients</i>
<b>First author</b>	<i>Marie-Lorraine Chretien</i>

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

<b>Responsible author</b> ( <i>author responsible for the integrity of the work as a whole</i> )
Name: Herve Avet-Loiseau
Institute: Unité de Génomique du Myélome, University Hospital, Toulouse, France
e-mail: avet-loiseau.h@chu-toulouse.fr

### **Author contributions**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :*

MLC, BH, HAL, and JC designed the study, performed the analyses, and wrote the manuscript, VCL performed the statistical analyses, and all other co-authors provided the samples and the follow-up patient data.
