## AUTHOR CONTRIBUTION FORM

<b>Title</b>	Targeted resequencing of 52 bone marrow failure genes in patients with aplastic anemia reveals an increased frequency of novel variants of unknown significance only in <i>SLX4</i>
<b>First author</b>	Laura C Collopy

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

<b>Responsible author</b> ( <i>author responsible for the integrity of the work as a whole</i> )
Name: Prof Inderjeet Dokal
Institute: Blizard Institute, Barts and The London School of Medicine and Dentistry, Queen Mary University of London
e-mail: i.dokal@qmul.ac.uk

### Author contributions

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.):*

LCC performed the laboratory work and wrote the paper. AJW performed the laboratory work. TJV coordinated the research. ISD performed the clinical work. ISD and TJV were the principal investigators.
