AUTHOR CONTRIBUTION FORM

Title	<i>MicroRNA-128-3p is a novel oncomiR targeting PHF6 in T-cell acute lymphoblastic leukemia</i>
First author	<i>Evelien Mets</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (<i>author responsible for the integrity of the work as a whole</i>)
Name: Frank Speleman
Institute: Center for Medical Genetics Ghent, Ghent University
e-mail: franki.speleman@ugent.be

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :

E.M. performed most of the experiments, J.V.d.M., G.V.P. and M.B. assisted with experiments. G.V.P., P.M. and J.VdS. designed the high-throughput 3'UTR-miRNA library screens. J.V.d.M., M.B. and H.G.W. performed and coordinated the mouse experiments. S.G. performed pathological analyses on the mouse tumors. E.M., J.V.d.M., G.V.P., P.M. and P.R. participated in data-analysis. T.T., Y.B., B.D.M., N.V.R. and B.P. collected and analyzed diagnostic T-ALL and normal thymocyte samples. E.M., P.V.V., F.S. and P.R. designed the experiments and coordinated the research. F.S. was the principle investigator of the project. E.M., F.S. and P.R. wrote the paper, with important contributions from G.V.P. The authors report no potential conflicts of interest. All authors approved the manuscript.
