AUTHOR CONTRIBUTION FORM

Title	Outcome and Management of Pregnancies in Severe Chronic Neutropenia Patients by the European Branch of the Severe Chronic Neutropenia International Registry
First author	Dr. Cornelia Zeidler

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (<i>author responsible for the integrity of the work as a whole</i>)
Name: Dr. Cornelia Zeidler
Institute: European Branch of the Severe Chronic Neutropenia International Registry (SCNIR), Dept. of Molecular Hematopoiesis, Hannover Medical School, Hanover, Germany
e-mail: Zeidler.cornelia@mh-hannover.de

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :

- CZ wrote the paper, analyzed data and established the concept of the study
- UG wrote the paper and analyzed data
- AN analyzed data
- BB contributed to write the paper
- GC contributed patient data on which the analysis is based
- EC contributed patient data on which the analysis is based
- CD contributed patient data on which the analysis is based
- JvD contributed patient data on which the analysis is based
- GN contributed patient data on which the analysis is based
- HAP contributed patient data on which the analysis is based
- HT contributed patient data on which the analysis is based

- GET contributed patient data on which the analysis is based
- FT contributed patient data on which the analysis is based
- CV contributed patient data on which the analysis is based
- JV contributed patient data on which the analysis is based
- BX contributed patient data on which the analysis is based
- KW established the concept of the study
