## AUTHOR CONTRIBUTION FORM

<b>Title</b>	<i>Infants with acute myeloid leukemia treated according to the Associazione Italiana di Ematologia e Oncologia Pediatrica 2002/01 protocol have an outcome comparable to that of older children.</i>
<b>First author</b>	<i>Riccardo Masetti</i>

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

<b>Responsible author</b> ( <i>author responsible for the integrity of the work as a whole</i> )
Name: Riccardo Masetti
Institute: Pediatric Hematology and Oncology University of Bologna
e-mail: riccardo.masetti@gmail.com

### **Author contributions**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :*

R.M. coordinated the work, analyzed data, performed statistical analyses and wrote the paper. R.R analyzed data and performed statistical analyses. F.L. designed and supervised the research and wrote the paper. A.P. contributed to the critical revision and writing of the manuscript. R.M., F.F., A.M., P.P., G.M., M.C.P. and A.P. treated patients and collected data. M.T., M.P. and G.B. performed the molecular/cytogenetic characterization of patients.

All authors read and approved the final version of the manuscript. The authors report no potential conflicts of interest.
