AUTHOR CONTRIBUTION FORM

Title	<i>Genome-wide Genotyping of Acute Myeloid Leukemia with Translocation t(9;11)(p22;q23) Reveals Novel Recurrent Genomic Alterations</i>
First author	<i>Michael Kühn, M.D.</i>

According to the International Committee of Medical Journal Editors (ICMJE)
(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (<i>author responsible for the integrity of the work as a whole</i>)
Name: Prof. Dr. Konstanze Döhner
Institute: Internal Medicine III, University Hospital of Ulm, Germany
e-mail: konstanze.doehner@uniklinik-ulm.de

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :

M.K.: designed the study, performed, and analyzed experiments, wrote the paper; L.B.: performed and analyzed experiments, wrote the paper; S.G.: performed experiments; J.K.: computational data analysis; J.E.: computational data analysis; F.G.R.: contributed important intellectual content, analyzed data; K.E.: collected mutational analysis data; P.P.: performed experiments; V.I.G.: collected mutational analysis data; K.H.: computational analysis; R.F.S.: contributed important intellectual content, clinical data collection and analysis; H.D.: designed the study, wrote the paper; K.D.: designed the study, analyzed experiments, and wrote the paper.
