# AUTHOR CONTRIBUTION FORM

| Title | Distinct characteristics of e13a2 versus e14a2 BCR-ABL1 driven chronic myeloid leukemia under first-line therapy with imatinib |
|---|---|
| First author | Benjamin Hanfstein |

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):
*"Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".*

**The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content**.

| Responsible author *(author responsible for the integrity of the work as a whole)* |
|---|
| Name: Prof. Dr. Martin C. Mueller |
| Institute: University Hospital Mannheim, Heidelberg University |
| e-mail: martin.mueller@medma.uni-heidelberg.de |

| Author contributions |
|---|
| *Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :* |
| BH, SSa, RH, AH and MCM take primary responsibility for the publication. BH designed the study and wrote the manuscript. SSa and RH organized the clinical trial. PE, CD, SSch, AH and MCM were responsible for molecular analyses, AF and CH for cytogenetic analyses. ML, MP and JH had the responsibility for statistical analyses. UP, SWK, JS, HE, MH, JD, CF, LK, AN, MK, FS, MP, CFW, KS, GMB, and WKH contributed to the design of the study, to the collection of data, to the statistical analyses and to the interpretation of results. |
