## AUTHOR CONTRIBUTION FORM

<b>Title</b>	<i>A randomized phase II trial of tacrolimus, mycophenolate mofetil and sirolimus after nonmyeloablative unrelated donor transplantation</i>
<b>First author</b>	<i>Brian Kornblit</i>

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

<b>Responsible author</b> ( <i>author responsible for the integrity of the work as a whole</i> )	
Name:	Brenda M. Sandmaier
Institute:	Fred Hutchinson Cancer Research Center and the University of Washington
e-mail:	bsandmai@fhcrc.org

### **Author contributions**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :*

BK drafted and revised the manuscript, analyzed and interpreted data. DGM and MBM designed the study, provided patients, and revised the manuscript. BES designed the study, performed statistical calculations and revised the manuscript. LV, PH, AAL, MAP, WAB, TRC, TL, FBP, KH, AEW, and MEDF provided patients and revised the manuscript. RS designed the study, provided patients, and revised the manuscript. BMS conceived, designed and supervised the study, provided patients, analyzed and interpreted data, drafted and revised the manuscript.
