AUTHOR CONTRIBUTION FORM

Title	Rapid induction of single donor chimerism after double umbilical cord blood transplantation preceded by reduced intensity conditioning: Results of the HOVON 106 phase II study.
First author	Judith A.E. Somers

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (<i>author responsible for the integrity of the work as a whole</i>)
Name: Jan J. Cornelissen
Institute: Erasmus MC-Daniel den Hoed Cancer, Dept of Hematology, Rotterdam, the Netherlands
e-mail: j.cornelissen@erasmusmc.nl

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :

Judith A.E. Somers performed research, analyzed data and wrote the paper; Eric Braakman performed the laboratory work for this study; Bronno van der Holt performed statistical analyses and Jan J. Cornelissen, Eefke J. Petersen, Erik W.A. Marijt and Cynthia Huisman recruited the patients. Marlies E. Groenendijk-Sijnke was responsible for central data management. Eric Braakman, Bronno van der Holt, Erik W.A. Marijt, Cynthia Huisman, Kees Sintnicolaas, Machteld Oudshoorn, Marlies E. Groenendijk-Sijnke and Anneke Brand critically reviewed the manuscript. Jan J. Cornelissen was the principal investigator and takes primary responsibility for the paper.
