AUTHOR CONTRIBUTION FORM

Title	<i>Reduced-toxicity conditioning prior to allogeneic stem cell transplantation improves outcome in patients with myeloid malignancies</i>
First author	<i>OUDIN Claire</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (*author responsible for the integrity of the work as a whole*)

Name: Claire OUDIN

Institute: Paoli-Calmettes Institute, Marseille, France

e-mail: claire-helene.oudin@ap-hm.fr

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :

Claire Oudin performed research, collected and analyzed data and wrote the paper. Didier Blaise and Mohamad Mohty designed and supervised the research, analyzed data and contributed to write the manuscript. Benjamin Esterni contributed to perform statistical analyses. Luca Castagna and Christian Chabannon contributed to analyze data. Patrice Chevalier, Sabine Furst, Thierry Guillaume, Jean El-Cheikh, Jacques Delaunay, Luca Castagna, Catherine Faucher, Norbert Vey, Angela Granata and Raynier Devilliers, contributed to recruit the patients and collected data. All the authors participated sufficiently in the work to take public responsibility for appropriate portions of the content, and gave final approval of the manuscript to be published.
