## AUTHOR CONTRIBUTION FORM

<b>Title</b>	<b><i>The Notch driven long non-coding RNA repertoire in T-cell acute lymphoblastic leukemia</i></b>
<b>First author</b>	<i>Kaat Durinck</i>

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

<b>Responsible author</b> ( <i>author responsible for the integrity of the work as a whole</i> )
Name: Frank Speleman
Institute: Ghent University
e-mail: franki.speleman@ugent.be

### **Author contributions**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :*

Kaat Durinck performed laboratory experiments and data analysis, was involved in the design of the experiments, the coordination of the research, generation of figures and writing of the manuscript.

Annelynn Wallaert performed laboratory experiments and data analysis, was involved in the design of the experiments, the coordination of the research, generation of figures and writing of the manuscript.

Inge Van de Walle assisted with the experiments (OP9-DLL1 co-culture system) and collected and analyzed normal thymocyte samples.

Wouter Van Looke assisted with data analysis (arrays and RNA-sequencing).

Suzanne Vanhauwaert assisted with the micro-array experiments.

Pieter-Jan Volders designed the micro-array and assisted with the data analysis.

Ellen Geerdens performed RNA-sequencing.

Yves Benoit collected diagnostic T-ALL samples (first cohort).

Nadine van Roy collected diagnostic T-ALL samples (first cohort).

Bruce Poppe collected diagnostic T-ALL samples (first cohort).

Jean Soulier collected diagnostic T-ALL samples (second cohort).

Jan Cools performed RNA-sequencing.

Pieter Mestdagh designed the micro-array.

Jo Vandesompele designed the micro-array.

Pieter Rondou designed experiments, coordinated the research and helped writing the paper.

Pieter Van Vlierberghe designed experiments, coordinated the research and helped writing the paper.

Tom Taghon collected and analyzed normal thymocyte samples, designed experiments, coordinated the research and wrote the paper.

Frank Speleman designed experiments, coordinated the research and wrote the paper.
