AUTHOR CONTRIBUTION FORM

Title	Specific molecular mutation patterns delineate CNL, atypical CML, and CMML
First author	Manja Meggendorfer

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (<i>author responsible for the integrity of the work as a whole</i>)
Name: Susanne Schnittger
Institute: MLL Munich Leukemia Laboratory GmbH
e-mail: susanne.schnittger@mll.com

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.):

Manja Meggendorfer investigated molecular analyses, analyzed the data and wrote the manuscript.

Torsten Haferlach was responsible for cytomorphology and study design.

Tamara Alpermann compiled statistical analyses.

Sabine Jeromin contributed to sequencing analyses.

Claudia Haferlach was responsible for cytogenetics.

Wolfgang Kern was responsible for statistical analyses.

Susanne Schnittger was the principle investigator of the study.
