

## **AUTHOR CONTRIBUTION FORM**

Title	Clinical features and outcome of SIL/TAL1-positive T-cell acute lymphoblastic leukemia in children and adolescents. A 10 year experience of the AIEOP group
First author	Mariella D'Angiò

According to the International Committee of Medical Journal Editors (ICMJE) (<a href="http://www.icmje.org/ethical\_1author.html">http://www.icmje.org/ethical\_1author.html</a>):

"Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (author responsible for the integrity of the work as a whole)				
Name: Anna Maria Testi				
Institute: Department of Biotechnologies and Hematology; Sapienza University of Rome,				
Italy				
e-mail: testi@bce.uniroma1.it				

## **Author contributions**

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.):

MDA. enrolled patients, interpreted data and wrote the manuscript; MGV analysed and interpreted data and critically reviewed the manuscript; AMT contributed to the study design, enrolled patients, analysed and interpreted the data and wrote the manuscript; VC contributed to the study design, enrolled patients, analysed and interpreted the data and critically reviewed the manuscript; VN performed molecular analyses; RP enrolled patients; AC contributed to the study design; NS enrolled patients; SV enrolled patients; MC enrolled patients; DS analysed and interpreted data and critically reviewed the manuscript; CC enrolled patients; LL performed molecular analyses; EM performed immunophenotyping analyses; FL contributed to the study design, enrolled patients, and critically reviewed the manuscript; GB contributed to the study design, coordinated the immunophenotyping analyses; RF contributed to the study design, enrolled patients, and critically reviewed the manuscript; AB contributed to the study design, enrolled patients and coordinated the molecular analyses and GC contributed to the study design, performed and coordinated the molecular analyses
