AUTHOR CONTRIBUTION FORM

Title	A rare case of <i>IGH/MYC</i> and <i>IGH/BCL2</i> double hit primary plasma cell leukemia
First author	<i>Anna Kalff</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (<i>author responsible for the integrity of the work as a whole</i>)
Name: Andrew Spencer
Institute: Alfred Hospital
e-mail: aspencer@netspace.net.au

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :

Anna Kalff collected clinical data, generated figures and wrote the article.

Tiffany Khong processed, cultured and analysed experimental data, generated figures and assisted in preparation of the article.

Meaghan Wall performed, generated and interpreted ALF1 data for karyotype analysis.

Gorniak Malgorzata performed and interpreted the results utilizing the EuroFlow panel of antibodies.

Sridurga Mithraprabhu was involved in the collection and analysis of the data.

Lynda J Campbell performed, generated, interpreted ALF2 data for karyotype analysis and wrote the article.

Andrew Spencer designed, interpreted the data and approved the final version of the article.
