AUTHOR CONTRIBUTION FORM

Title	Revisiting the immune microenvironment of diffuse large B-cell lymphoma using a tissue microarray and immunohistochemistry: robust semi-automated analysis reveals CD3 and FoxP3 as potential predictors of response to R-CHOP
First author	Rita Coutinho

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (<i>author responsible for the integrity of the work as a whole</i>)
Name: Rita Coutinho
Institute: Department of Hemato-Oncology, Barts Cancer Institute, Queen Mary University, London, United Kingdom
e-mail: r.coutinho@qmul.ac.uk

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :

RC was responsible for the conception and designed of the study, development of the methodology, data assembly, analysis and interpretation. RC wrote the original manuscript and performed all revisions.

AJC developed the methodology, acquired and assembled data, interpreted results and reviewed all versions of the manuscript.

PG developed the methodology and critically reviewed all versions of the manuscript.

AO, AW and JM assembled data, analyzed results and critically reviewed all versions of the manuscript.

EM and DN performed statistical analysis and critically reviewed all versions of the manuscript.
AL, RA, MGS, JC acquired and assembled data and critically reviewed all versions of the manuscript.

MC conceptualized the study, assembled and acquired data, analyzed and interpreted the results and critically reviewed all versions of the manuscript.

JGG conceptualized the study, assembled and acquired data, analyzed and interpreted the results, helped writing the original manuscript and critically reviewed all other versions of the manuscript.
