AUTHOR CONTRIBUTION FORM

Title	Serum survivin and vascular endothelial growth factor in extranodal NK/T-cell lymphoma, nasal type: implications for a potential new prognostic indicator
First author	Seok Jin Kim

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):
"Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author *(author responsible for the integrity of the work as a whole)*
Name: Won Seog Kim
Institute: Samsung Medical Center, Sungkyunkwan University School of Medicine, Seoul, Korea
e-mail: wskimsmc@skku.edu

Author contributions
Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :
Seok Jin Kim designed the research and was the primary manuscript writer. Kyung Ju Ryu and Jung Yong Hong performed multiplex chemokine assay. In Gu Do performed the immunohistochemistry assays for survivin. Hae Yong Yoo and Seung Ho Lee performed in vitro study and interpreted the results. Seok Jin Kim and Won Seog Kim reviewed and revised the manuscript. Mineui Hong and Young Hyeh Ko conducted the pathology reviews of all patients. Seok Jin Kim and Won Seog Kim conducted all data analysis.
