

## AUTHOR CONTRIBUTION FORM

<b>Title</b>	<b>Correlation between peripheral blood and bone marrow regarding FLT3-ITD and NPM1 mutational status in patients with acute myeloid leukemia</b>
<b>First author</b>	<i>Wei-Gang Tong</i>

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

<b>Responsible author</b> ( <i>author responsible for the integrity of the work as a whole</i> )
Name: <i>Elihu H. Estey</i>
Institute: <i>University of Washington/Fred Hutchinson Cancer Research Center</i>
e-mail: <i>eestey@seattlecca.org</i>

<p><b>Author contributions</b> <i>Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :</i></p> <p>WGT and EHE designed the study, analyzed data, and wrote the paper.</p> <p>PCH, PSB, JMP, RBW and EHE contributed patients.</p> <p>VKS helped with data collection, performed the statistical analysis.</p> <p>BLW is the hematopathologist.</p> <p>All authors have reviewed and approved the manuscript.</p>
