

## **AUTHOR CONTRIBUTION FORM**

Title	MULTIFUNCTIONAL HUMAN CD56 <sup>low</sup> CD16 <sup>low</sup> NATURAL
	KILLER CELLS ARE THE PROMINENT SUBSET IN BONE
	MARROW OF BOTH PEDIATRIC HEALTHY DONORS AND
	LEUKEMIC PATIENTS.
First author	
	Stabile Helena

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical\_1author.html):

"Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (author responsible for the integrity of the work as a whole)	
Name: Gismondi Angela	
Institute: Dept Molecular Medicine, Univ La Sapienza, Rome	
e-mail: angela.gismondi@uniroma1.it	

## **Author contributions**

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.):

H.S., P.N., and S.M. performed experiments

H.S. and A.G. analyzed results

D.P., A.B., and F.L. were involved in clinical care of patients

F.L. contribute to the critical revision of the paper

A.S., H.S. and A.G. designed the research and wrote the paper
