

AUTHOR CONTRIBUTION FORM

Title	HLA-G expression levels influence the tolerogenic activity of human DC-10
First author	Giada Amodio

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):

"Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (author responsible for the integrity of the work as a whole)

Name: Silvia Gregori

Institute: San Raffaele Telethon Institute for Gene Therapy (HSR-TIGET), Division of Regenerative Medicine, Stem Cells and Gene Therapy, IRCCS San Raffaele Scientific Institute, Milan, Italy;

e-mail: gregori.silvia@hsr.it

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.):

G.A. performed the experiments, collected and analyzed data and wrote the manuscript; M.C., D.T., M.E.G. performed some of the experiments; R.R. provided reagents and protocols for detection of soluble HLA-Gs; J.LM. provided protocols for HLA-G RT-PCR; M.G.R. contributed to the scientific supervision; S.G. conceived the scientific idea, supervised the project, and wrote the manuscript.
