Title	T Replete Haploidentical versus Autologous Stem Cell Transplantation in Adult Acute Leukemia: A Matched Pair Analysis
First author	<i>NC Gorin</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Author contributions

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :

Norbert-Claude Gorin was the primary investigator for this study. Norbert-Claude Gorin, Myriam Labopin, Simona Piemontese and Mohamad Mohty designed the study, the synopsis of which was approved by the acute leukemia working party of the EBMT. Myriam Labopin did the statistical analysis. Norbert-Claude Gorin wrote the first draft of the manuscript. All other co-authors contributed data to the EBMT registry, read the manuscript and approved the final version. The authors have no disclosure.
