## AUTHOR CONTRIBUTION FORM

|                     |   |
|---------------------|---|
| <b>Title</b>        | <b>Ibrutinib impairs the phagocytosis of rituximab-coated leukemic cells from Chronic Lymphocytic Leukemia patients by human macrophages.</b> |
| <b>First author</b> | <b>Mercedes Borge</b>   |

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

|   |
|---|
| <b>Responsible author</b> ( <i>author responsible for the integrity of the work as a whole</i> )                |
| Name: Mercedes Borge  |
| Institute: Instituto de Medicina Experimental (IMEX), CONICET - Academia Nacional de Medicina, CABA, Argentina. |

### **Author contributions**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.) :*

Mercedes Borge: designed the study, did most of the experiments, created the figures and wrote the manuscript.

María Belén Almejún, Enrique Podaza and Ana Colado: contributed in the purification of CLL samples, in the laboratory work and in the analysis and interpretation of the data.

María Cabrejo, Horacio Fernandez Grecco and Fernando Raimundo Bezares: provided patients samples, advice and critically reviewed the manuscript.

Mirta Giordano: participated in the project conception and critically reviewed the manuscript.

Romina Gamberale: participated in the project conception, wrote the manuscript and supervised the study.
